Minimum disclosure document (T Class) - 31 October 2024

Equity Fund Aim

The Fundsmith Equity Fund ("the Fund") will invest in equities on a global basis. The Fund's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The Fund has stringent investment criteria which the Authorised Corporate Director and the Investment Manager adhere to in selecting securities for the Fund's investment portfolio. These criteria aim to ensure that the Fund invests in:

- high quality businesses that can sustain a high return on operating capital employed;
- businesses whose advantages are difficult to replicate;
- businesses which do not require significant leverage to generate returns;
- businesses with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- businesses that are resilient to change, particularly technological innovation;
- businesses whose valuation is considered by the Fund to be attractive.

Investors should be aware that the application of these investment criteria significantly limits the number of potential investments for the Fund's portfolio. It is envisaged that the investment portfolio of the Fund will be concentrated, generally comprising between 20 and 30 stocks. This fund invests for the long-term and may not be appropriate for investors who plan to withdraw their money within 5 years.

The fund will not invest in derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances.

Performance, % Total Return, T Class, Accumulation

	Oct 2024	2024 to 31 Oct 2024	2023	2022	2021	2020	2019	From Inception (Cumulative) 01.11.10 to 31.10.2024	From Inception (Annualised) to 31.10.2024
Fundsmith ¹	-0.2	+6.9	+12.4	-13.8	+22.1	+18.3	+25.6	+594.8	+14.8
MSCI World ²	+2.3	+15.5	+16.8	-7.8	+22.9	+12.3	+22.7	+381.4	+11.9

Annualised performance is a conversion of the performance of the fund on an annual basis in Sterling. The annualised figure above means that the performance of the fund has been an average 14.8% per year since inception. The 10 year annualised performance is 14.1% for the fund and 12.2% for MSCI World. Past performance is not necessarily a guide to future performance.

Just a small number of high quality, resilient, global growth companies that are good value and which we intend to hold for a long time, and in which we invest our own money.

1. Net of fees comparing fund prices at midday UK time. Source: Fundsmith.
2. MSCI World Index (GBP Net) priced at close of business US time.
3. Net Yield reflects the historic dividend income received by the fund in the preceding 12 months less the deduction of all expenses including management fees i.e. Gross Yield less the TER (Total Expense Ratio).
4. NAV: The net asset value represents the assets of a Fund less its liabilities.
5. The PTR (Portfolio Turnover Ratio) has been calculated in accordance with the methodology laid down by the FCA. This compares the total share purchases and sales less total creations and liquidations with the average net asset value of the fund.
6. 7 day fund liquidity is calculated based upon 30% of trailing 20 days average volume.
7. Annualised Performance: Annualised performance show longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
8. The highest and lowest returns for any 1 year over the period since inception have been shown.
9. % Positive months: The percentage of months since inception where the fund has delivered positive return.
10. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's and "GICS®" is a service mark of MSCI and Standard & Poor's.

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Investment Manager. The Investment Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Fundsmith Equity Fund is authorised by the FSCA under section 65 of the Collective Investment Schemes Control Act 2002.

Collective Investment Schemes prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual Management fee) from the portfolio divided by the number of participatory interests (shares) in issue. Forward pricing is used. A Collective Investment Scheme may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees either with respect to the capital or the return of a portfolio.

Performance has been calculated using net NAV to NAV numbers, including all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period in Sterling. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. The return may increase or decrease if the investor is comparing the returns in a different currency. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures, application forms and annual and interim report and accounts, please go to www.fundsmith.co.za or contact Fundsmith LLP where they are available free of charge.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. This fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

Charges

The charges for the fund are shown below. The total expense ratio is based on the fund's expenses for the year and is updated following the publication of accounts for the periods ending 30th June and 31st December. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges (Annual Management Charge) are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 1.00% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

One-off charges taken before or after you invest	
Entry charge	Not Charged
Exit charge	Not Charged
Charges taken from the fund over the year	
Total expense ratio	1.04%
Charges taken under certain conditions	
Performance fee	Not Charged

The fund is priced all UK business days and can be found here: <https://www.fundsmith.co.uk/factsheet/>
